Introduction of GSYS2.4.7 Digitizer

Vidya Thakur

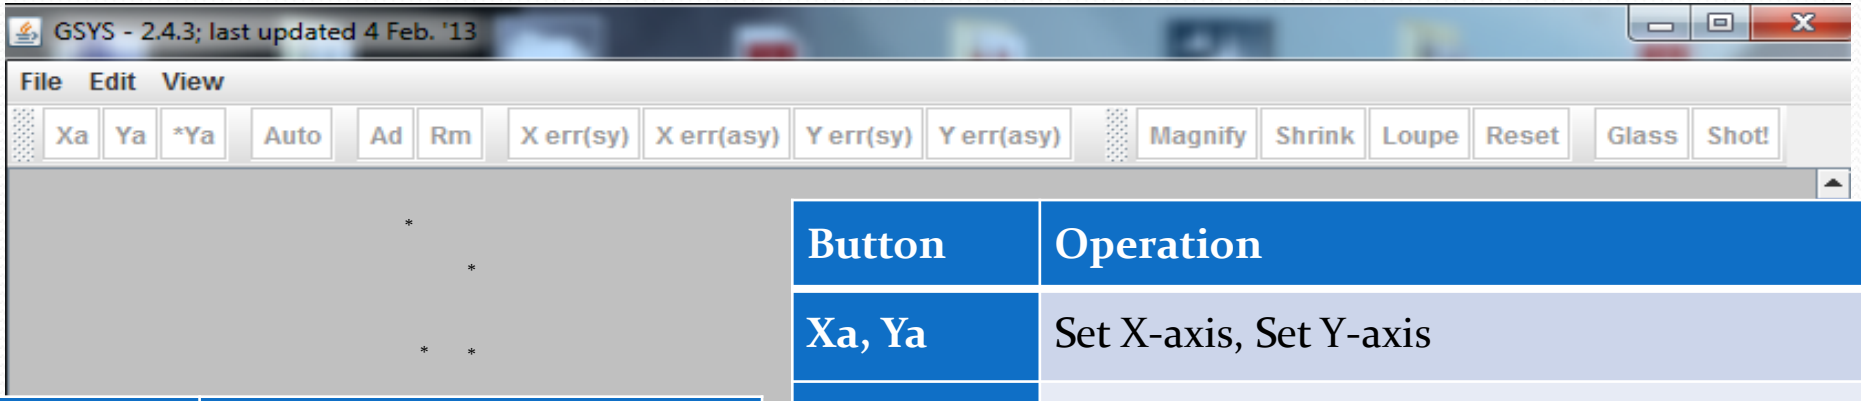
IET Bhaddal Ropar, Punjab, India

The 6th DAE-BRNS Theme Meeting on
EXFOR Compilation of Nuclear Data
Bangalore University, Bangalore , India
20–24, Jan. 2015

Introduction and Installation of GSYS 2.4.7 Digitizers

- Developed in 2005 by JCPRG (SAPPORO) group.
- Used by the EXFOR compilers in Japan and other countries.
- A software tool to digitize data points on the figure image.
- GSYS2.4.7 is the newest version.
- Works on Window, Linux and Mac.
- Support PNG, GIF and JPEG image format.
- Copy Gsys2.4.7.exe (for EXFOR compilers) on desktop. http://www.jcprg.org/gsys/
- Click the icon “Gsys2.4.7.exe” to start in the Windows.
- Install Java 1.4 or later if it does not work.

Introduction of the Main Panel of GSYS 2.4.7



Button	Operation
Xa, Ya	Set X-axis, Set Y-axis
*Ya	Set end point of Y-axis when starting point is the same as X axis
Auto	Set an axis by automatic axis detection.
Ad	Add data points.
Rm	To remove the uncorrected marked data point
X err(sy)	Set symmetric error for X direction
X err(asy)	Set asymmetric error for X direction.
Y err(sy)	Set symmetric error for Y direction.
Y err(asy)	Set asymmetric error for Y direction.

Button	Operation
Glass	To enlarge the particular data point.
Loupe	To enlarge a particular area.
Magnify	To enlarge the image.
Shrink	To obtained the original size.

- Enlarge the image for better accuracy.
- Pay special attention when x- and y-axis positions are determined for better accuracy.
- Use the fixed and floating decimal point expression for the numbers digitized from linear and logarithmic scale, respectively. Example:

12.345 (a value digitized from linear scale)

1.2345E+02 (a value digitized from logarithmic scale)

- Consider rounding of digitized values to reflect digitization accuracy. Consider rounding of digitized values to integers if values are for atomic numbers, mass numbers etc., and digitized values are close to integers.

Digitization Exercise

- Open GSYS2.4.7_Quick.doc.

(available in the IAEA website:

https://www-nds.iaea.org/nrdc/india/ws2015/

- Do digitization for Fig.3 and Fg.4.

- Put digitized values on the EXCEL sheet (dig-exc.xls) and check your performance by standard deviations.

- Do it for Fig.11, Fig.12 and Fig.13, too.

Thanks for your Attention
