

János Timár and Zoltán Elekes

Nuclear Structure and Decay Data Evaluation at MTA Atomki, Hungary

Progress Report

Permanent and temporary responsibilities

Permanent

<u>Mass</u>	<u>Last NDS</u>	<u>ENSDF update</u>
101	1998	2006-10
102	2009	2009-08
103	2009	2009-10
104	2007	2007-09
105	2005	2005-11

Temporary: 46 (2000), 128

Activities in 2015-2016

- Evaluation for mass chain 128 is published (NDS 129, 191 2015).
- We have evaluated mass chain 101 with our Romanian colleagues, Alexandru Negret and Sorin Pascu, and it is submitted for review.
- We have evaluated mass chain 46, and it is almost ready for submission.
- Mass chain 105 is evaluated in collaboration with Stefan Lalkovski from University of Sofia. From our side the evaluation is ready, Stefan is working on the last isotope.
- We have organized a workshop for European evaluators at MTA Atomki (http://users.uoa.gr/~tmertzi/NDE_Workshop/index.html) where we discussed how we could involve more people in the evaluation work.

Plans for the next two years

- We would like to publish the evaluations for mass chains 101, 105 and 46.
- We intend to continue to work together with the Romanian data center and evaluate mass chains 118, first and 103 later. If we have time we also would like to start working on mass chain 104.
